

Which pictures should you upload?

When you create your own website you will want to put pictures of yourself on it. Consider each of the pictures of the cousins and choose which ones are safe to upload.

Picture 1

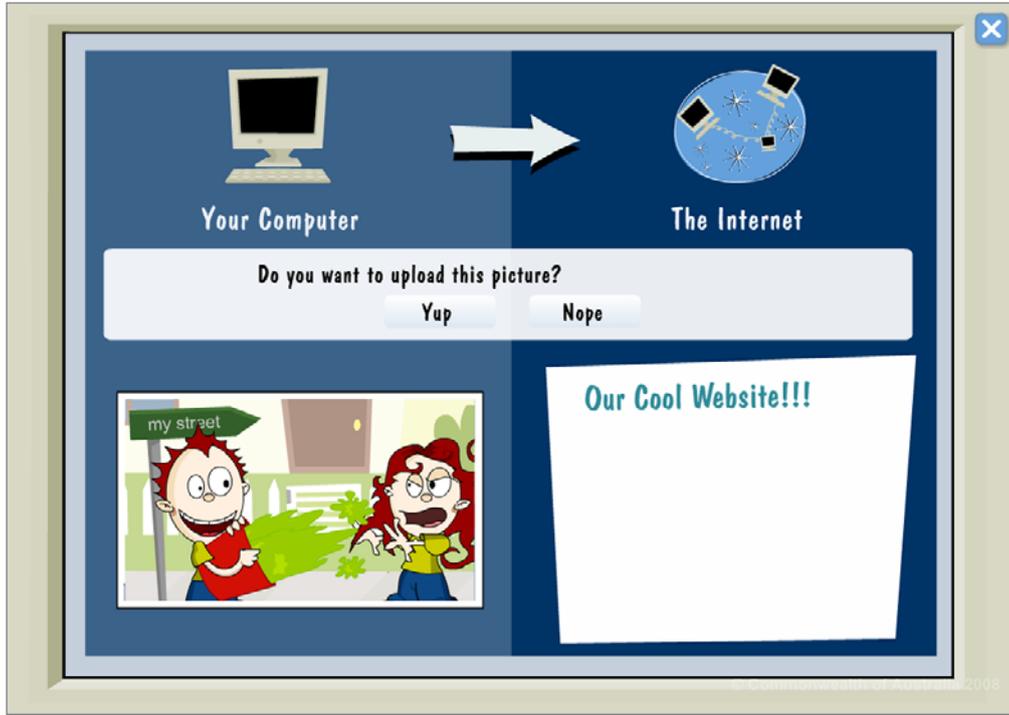

The cousins fooling around with slime. They are dressed in their swimsuits and have slime on their face and stomach. Would you upload this picture?

cyber(smart:)

Picture 2

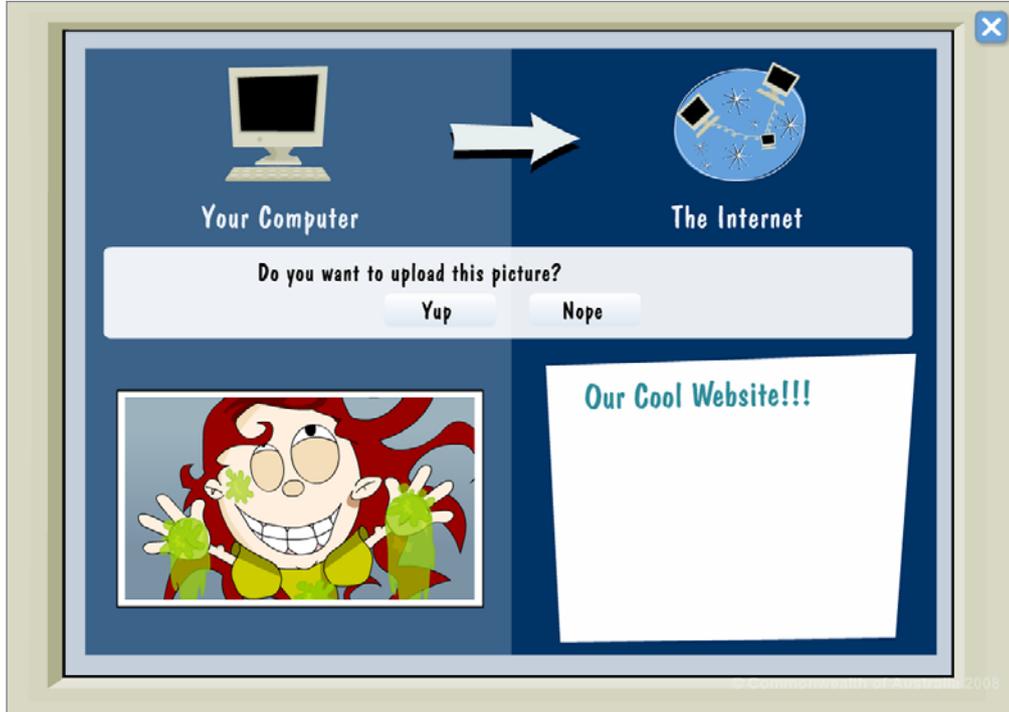

The cousins standing in their street. The street name is on the street sign. Would you upload this picture?

cyber(smart:)

Picture 3

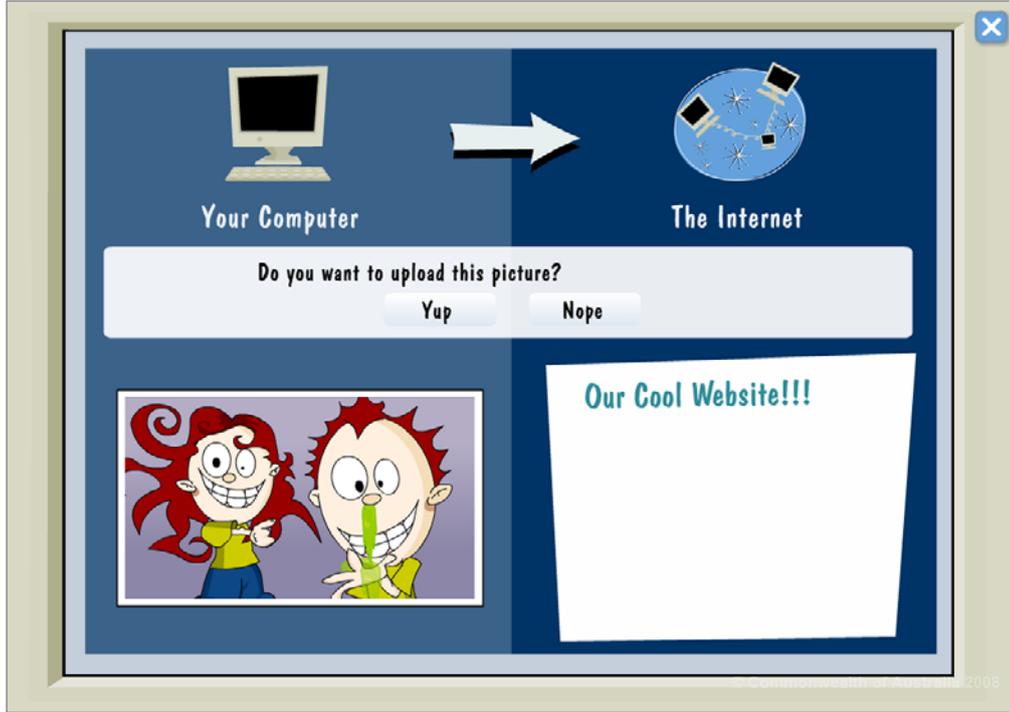

The girl cousin with slime on her hands and face. Would you upload this picture?

cyber(smart:)

Picture 4

The boy cousin with a stick of slime. Would you upload this picture?

cyber(smart:)

Did you choose a safe picture to upload?

A safe picture would not contain information like the name of the street you live in. So you shouldn't upload picture two.

Remember, adults you don't know may look at this site. Also remember that any pictures you put online can be taken and used and even altered by others.

A picture that, at first, seems like fun to you might be used by someone else to make fun of you or to embarrass you. So you probably would not upload picture one in which you are very messy and dressed in your swimsuits.

You could have chosen to upload pictures 3 or 4 in which you are just playing with slime.
